

FRONTLINE PROGRAM NOW AVAILABLE AT B&B!

Frontline is an effective flea and tick control which kills all flea stages for up to three months and ticks for one month. It is only sold through veterinarians to assure proper usage. The minimum age for application in puppies is eight weeks old. It should be noted that it is not approved for usage in pregnant or nursing mother dogs. Once monthly application is recommended. It remains effective after bathing or swimming because it is stored in the oil secreting glands of the skin. It should be applied two days after bathing to assure adequate oil on the skin to spread the product over the body. Frontline may cause temporary irritation at the application site. Owners should avoid contact with the treated area until dry. Six dose cards are offered at Biscuits & Bath because flea and tick season ranges from May 1st thru November 1st depending on weather conditions.

PLEASE CALL CUSTOMER CARE AT (212) 419-2500 TO UTILIZE OUR NEW FRONTLINE SERVICE. THIS PROGRAM WILL SAVE YOU TIME AND HASSLE WHILE ENSURING YOUR DOG IS PROTECTED.
